

DT-1000

DOWNDRAFT DUST COLLECTING TABLE

Features

- Ideal for supporting workpieces while they are being sanded.
- Dust is immediately drawn down into the table interior, rather than floating up into operator's face.
- By collecting dust at its source, far less dust is floating in the air inside the workshop.
- Strong sheet steel construction, with three fold-down rear and inside flaps.
- Rubber grommets around table air holes to support workpieces being processed.
- On/off switch, cord and 3 pin plug provided.

Technical Data

Size of work table	940mm x 640mm
Height of work table from floor	800mm
Dust particles retained by filter	0.5 microns and larger
Throughput of air capacity	1600cfm
Single phase motor	0.5hp
