

LINEA 3200M SLIDING TABLE PANEL SAW

with 3200mm maximum cutting stroke and manual machine settings

Model Shown 3800

Features

- Heavy duty, high precision aluminum sliding table assembly, with excellent strength and rigidity.
- Smooth table movement - large diameter rollers running on hard chromed 19mm diameter steel bars.
- Heavy duty outrigger frame locks to table with eccentric clamp.
- Large section crosscut fence with precision work stops.
- Massive swinging support arm below outrigger frame, to easily support the heaviest panels.
- Manual rise and fall of main saw blade by large handwheel.
- Manual rise and fall of scoring blade.
- Manual sideways adjustments of scoring blade.
- Manual tilting of saw blade assembly to required angle by large handwheel.
- Electronic digital readouts of blade tilt angle and blade speed selected.
- Heavy duty ripping fence mounted on large 50mm diam. round bar.
- Overhead safety guard with see-through sides and dust exhaust outlet on support frame.
- Machined cast iron main table supported by heavy gauge pressed steel machine body.
- All sealed ball race bearings on saw blade arbors and under sliding table.
- Accurate mitre fence adjustable from 30° to 135°.
- One main saw blade and one scoring blade included.

OPTIONAL

- Electronic digital readout on outrigger crosscut fence work stop, to read exact position of either work stop as selected, instead of work stops reading only from measuring tapes.
- Electronic digital readout on rip fence, to read exact position of the fence, instead of standard rip fence assembly reading only from measuring tape.

Technical Data

Dimensions of sliding table	3200 mm x 380 mm	Maximum depth of cut @ 45°	70 mm
Maximum saw blade diameter	350 mm	Main saw blade motor	7.5 hp
Diameter of scoring saw blade	120 mm	Scoring saw blade motor	1 hp
Saw blade assembly tilting	0° to 45°	Maximum width of cut on rip fence	1300 mm
Maximum depth of cut @ 90°	100 mm	Nett weight of machine	870 kg
