

MJ-2325A

10" SLIDING TABLE SAW

Features

- Heavy duty machine with cast iron table and steel cabinet base.
- Strong steel sliding table running on solid steel bars on nine ballrace bearings.
- Aluminium crosscut fence mounted on sliding table.
- 10" (254mm) diameter TCT saw blade with safety guard.
- Tilting arbor to 45° and blade rise and fall by two handwheels.
- Riving knife behind blade tilts with blade and supports safety guard.
- Aluminium rip fence with positive lever locking and micro-adjustment knob.
- Accurate mitre gauge slides in table slots either side of blade.
- 100mm diameter dust extraction chute on rear of machine.

Technical Data

Maximum saw blade diameter	254 mm (10")
Saw blade bore diameter	25.4 mm (1")
Maximum height of cut @ 90°	75 mm
Maximum height of cut @ 45°	60 mm
Maximum ripping width	630 mm
Work table with extensions	1170 mm x 800 mm
Dimensions of sliding table	500 mm x 600 mm
Cutting stroke of sliding table	1250 mm
Work table height from floor	870 mm
Nett weight of machine	189 kgs
Single phase saw motor	2 hp
